Reproduction, distribution or sale of this document or communication of its contents to others without express authorisation is prohibited. Offenders will be liable for damages. All rights reserved in the event that a patent, utility model or design patent is registered. All product designations and brand names used are the property of the owners and not explicitly identified as such.

All technical data are subject to change according to technical updates.
Preface

These repair instructions are valid for the cylinders with piston rod listed on the title page to the exclusion of any liability claims.

Deviations compared to the descriptions in these repair instructions may arise depending on the design and/or modification status of the cylinder with piston rod. The user must check this prior to carrying out the repair and take the deviations into consideration if necessary.

These repair instructions have been prepared with care.

Festo AG & Co. KG does not, however, accept liability for any errors in these repair instructions or their consequences. Likewise no liability is accepted for direct or consequential damage resulting from improper use of the products.

More detailed information on this can be found in chapter 8 “Liability”.

The relevant regulations on occupational safety, safety engineering and interference suppression as well as the stipulations contained in these repair instructions must be observed when working on the products.

1 Important information

1.1 About these repair instructions

This document contains important information about the professional repair of the cylinder with piston rod of the type CRDSNU.

The cylinder with piston rod CRDSNU is fully repairable in the event of damage due to normal wear. The entire cylinder must be replaced in the event of damage to the cylinder barrel.

Before carrying out a repair, the relevant chapter in these instructions must be read in full and followed consistently.

For reasons of clarity, these repair instructions do not contain complete detailed information. The following documents should therefore also be available when repairing the cylinder with piston rod:

- **Operating instructions for the respective cylinder with piston rod**
  Contains information about the control sections and connections of the cylinder with piston rod as well as the function, structure, application, installation, commissioning, maintenance and care, etc. Can be found on the Festo website (www.Festo.com).

- **Spare parts documentation**
  Contains an overview of the spare and wearing parts as well as information on their installation. Can be found in the online spare parts catalogue on the Festo website (spareparts.festo.com).

- **Assembly aids**
  Contain an overview of available assembly aids such as lubricating greases, locking agents, maintenance tools, etc. (aids for assembly and maintenance).
  Can be found in the online spare parts catalogue on the Festo website (www.Festo.com).

1.2 Pictograms used in these repair instructions

- **Warning**
  This sign indicates a dangerous situation for persons and/or the product. Failure to observe this warning can result in injury to persons and/or damage to the device.

- **Note**
  This sign provides important tips and information that can make your work easier.

- **Environment**
  This sign provides information on the steps required for environmentally-friendly use of materials and equipment, as well as the guidelines and regulations that may need to be observed.

- **Accessories**
  This sign contains information on accessories and attachments relevant to the context.

- **Documents**
  This sign contains references to other chapters or documents containing additional information.
1.3 General safety instructions

**Warning**
The cylinder with piston rod must only be repaired by authorised and trained persons in accordance with the specifications in the technical documentation and using original spare parts.
Installation and repair by unauthorised and untrained persons, repairs using non-original spare parts or without the technical documentation required for installation and/or repair are dangerous and therefore not permitted.
Repairs must only be carried out in conjunction with these repair instructions and the device-specific operating instructions.

**Note**
Instead of carrying out the repair yourself, your local Festo sales office offers the option of having the repair carried out by Festo.

**Environment**
Components and equipment replaced as part of a repair must be disposed of in accordance with the locally valid environmental protection regulations.

2 General product description

2.1 Functional description
The piston moves in the cylinder barrel when the cylinder chamber is pressurised. The piston rod transmits the movement to the outside. The advanced piston rod is retracted again when the other cylinder chamber is pressurised.

1. Sealing seat
2. O-ring
3. Slotted nut
4. Piston rod
5. Front compressed air connection
6. Cylinder barrel
7. Rear compressed air connection
2.2 Type codes (ascertaining the features of a cylinder)

The precise features of the current cylinder with piston rod can be ascertained with the help of the rating plate on the cylinder. The type designation is located directly beneath the Festo logo and describes the cylinder’s features separated by a hyphen (-).

Example:

![Festo Logo]

<table>
<thead>
<tr>
<th>CRDSNU-32-100-PPV-A-MQ-10K2-50K8-TT</th>
<th>1 Type designation</th>
</tr>
</thead>
<tbody>
<tr>
<td>552791 A008</td>
<td>2 Serial number</td>
</tr>
<tr>
<td>pmax. 10 bar / 145 psi</td>
<td>3 Technical information</td>
</tr>
<tr>
<td></td>
<td>4 Part number</td>
</tr>
</tbody>
</table>

The type designation on this rating plate provides the following information:

CRDSNU Cylinder of the type CRDSNU
32 Piston diameter 32 mm
100 Stroke 100 mm
PPV Adjustable end-position cushioning
A Sensing option (magnetic piston)
MQ Short end cap without swivel mounting
10K2 Piston rod thread extended by 10 mm
50K8 Piston rod extended by 50 mm at one end
TT Low-temperature seal

Note

A list and description of all possible equipment features of the cylinder with piston rod can be found in the data sheet. It is available on the Festo website (www.festo.com).

2.3 Orientation designations and bearing cap variants

This diagram provides an overview of the orientation designations for the cylinder with piston rod.

Orientation:
Festo = product identification (rating plate) as reference point
Q = top
U = underneath
R = right
L = left
V = front
H = rear
3 Component overview

3.1 Standard cylinder, to ISO 6432, stainless steel, CRDSNU-... (incl. S6, A1, A3 without A2 and TT)

This diagram is intended only to provide an overview of the individual components. To order spare and wearing parts, please use the online spare parts catalogue on the Festo website (spareparts.festo.com).

<table>
<thead>
<tr>

</tbody>
</table>

**Note**

Only the fully assembled sealing seat (item 2 to 6, see above) can be ordered as a spare part. It is recommended to order the O-ring (item 8, see above) at the same time.
4 Repair steps

Only the complete sealing seat can be replaced on the cylinder of the type CRDSNU.

4.1 Preparation

- Before starting the repair, remove any attachments in accordance with the instructions in the accompanying operating instructions.
- Keep your working environment tidy.
- Only use the spare parts and assembly aids (grease, locking agent, etc.) provided in the set of wearing parts.

**Warning**

Make sure that the sealing seat cannot suddenly come flying off.

- Remove the non-return valves and tubing connection from the cylinder and depressurise the cylinder completely so that any pressure present is not suddenly released when the cylinder is opened.

To prevent damage to sealing rims or guide surfaces, do not use pointed or sharp-edged assembly aids.

4.2 Visual inspection

Check the cylinder for visible damage that might impair its function (e.g. warping of the piston rod) as well as deposits and scoring. The entire cylinder must be replaced if the cylinder barrel is showing signs of significant damage.

4.3 Repairing the cylinder CRDSNU-...-A1

The description in this chapter can be used to repair cylinders of the type CRDSNU-...-A1 with the following features:

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>P</td>
<td>Elastic cushioning rings/pads at both ends</td>
<td>S2</td>
<td>Through piston rod (not possible with MQ and MG)</td>
</tr>
<tr>
<td>PPS</td>
<td>Self-adjusting pneumatic cushioning</td>
<td>...K2</td>
<td>Extended male piston rod thread (not possible with K3)</td>
</tr>
<tr>
<td>PPV</td>
<td>Adjustable pneumatic cushioning</td>
<td>K3</td>
<td>Female piston rod thread (not possible with K2 and K5)</td>
</tr>
<tr>
<td>A</td>
<td>Position sensing</td>
<td>...K5</td>
<td>Special piston rod thread (not possible with K3)</td>
</tr>
<tr>
<td>MQ</td>
<td>Short end cap without swivel mounting (not possible with S2)</td>
<td>...K8</td>
<td>Extended piston rod at front</td>
</tr>
<tr>
<td>MG</td>
<td>Sealing seat without mounting thread (not possible with S2)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The repair steps can be found in chapter 4.8 “Repair steps for replacing the sealing seat”.

### 4.4 Repairing the cylinder CRDSNU-....-S6

The description in this chapter can be used to repair cylinders of the type CRDSNU-....-S6 with the following features:

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>P</td>
<td>Elastic cushioning rings/pads at both ends</td>
<td>S2</td>
<td>Through piston rod (not possible with MQ and MG)</td>
</tr>
<tr>
<td>PPV</td>
<td>Adjustable pneumatic cushioning</td>
<td>...K2</td>
<td>Extended male piston rod thread (not possible with K3)</td>
</tr>
<tr>
<td>A</td>
<td>Position sensing</td>
<td>K3</td>
<td>Female piston rod thread (not possible with K3 and K5)</td>
</tr>
<tr>
<td>MQ</td>
<td>Short end cap without swivel mounting (not possible with S2)</td>
<td>...K5</td>
<td>Special piston rod thread (not possible with K3)</td>
</tr>
<tr>
<td>MG</td>
<td>Sealing seat without mounting thread (not possible with S2)</td>
<td>...K8</td>
<td>Extended piston rod at front</td>
</tr>
</tbody>
</table>

The repair steps can be found in chapter 4.8 "Repair steps for replacing the sealing seat".

### 4.5 Repairing the cylinder CRDSNU-....-A3

The description in this chapter can be used to repair cylinders of the type CRDSNU-....-A3 with the following features:

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>P</td>
<td>Elastic cushioning rings/pads at both ends</td>
<td>S2</td>
<td>Through piston rod (not possible with MQ and MG)</td>
</tr>
<tr>
<td>PPS</td>
<td>Self-adjusting pneumatic cushioning</td>
<td>...K2</td>
<td>Extended male piston rod thread (not possible with K3)</td>
</tr>
<tr>
<td>PPV</td>
<td>Adjustable pneumatic cushioning</td>
<td>K3</td>
<td>Female piston rod thread (not possible with K3 and K5)</td>
</tr>
<tr>
<td>A</td>
<td>Position sensing</td>
<td>...K5</td>
<td>Special piston rod thread (not possible with K3)</td>
</tr>
<tr>
<td>MQ</td>
<td>Short end cap without swivel mounting (not possible with S2)</td>
<td>...K8</td>
<td>Extended piston rod at front</td>
</tr>
<tr>
<td>MG</td>
<td>Sealing seat without mounting thread (not possible with S2)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The repair steps can be found in chapter 4.8 "Repair steps for replacing the sealing seat".

### 4.6 Repairing the cylinder CRDSNU-....-TT

The description in this chapter can be used to repair cylinders of the type CRDSNU-....-TT with the following features:

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>P</td>
<td>Elastic cushioning rings/pads at both ends</td>
<td>...K2</td>
<td>Extended male piston rod thread (not possible with K3)</td>
</tr>
<tr>
<td>PPV</td>
<td>Adjustable pneumatic cushioning</td>
<td>K3</td>
<td>Female piston rod thread (not with standard cylinder; not possible with K2 and K5)</td>
</tr>
<tr>
<td>A</td>
<td>Position sensing</td>
<td>...K5</td>
<td>Special piston rod thread (not possible with K3)</td>
</tr>
<tr>
<td>MQ</td>
<td>Short end cap without swivel mounting (not possible with S2)</td>
<td>...K8</td>
<td>Extended piston rod at front</td>
</tr>
<tr>
<td>S2</td>
<td>Through piston rod (not with standard cylinder; not possible with MQ)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The repair steps can be found in chapter 4.8 "Repair steps for replacing the sealing seat".
4.7 Repairing the cylinder CRDSNU-...-A2

The description in this chapter can be used to repair cylinders of the type CRDSNU-...-A2 with the following features:

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>P</td>
<td>Elastic cushioning rings/pads at both ends</td>
<td>S2</td>
<td>Through piston rod (not with standard cylinder; not possible with MQ)</td>
</tr>
<tr>
<td>PPS</td>
<td>Self-adjusting pneumatic cushioning</td>
<td>...K2</td>
<td>Extended male piston rod thread</td>
</tr>
<tr>
<td>PPV</td>
<td>Adjustable pneumatic cushioning</td>
<td>K3</td>
<td>Female piston rod thread (not with standard cylinder; not possible with K2 and K5)</td>
</tr>
<tr>
<td>A</td>
<td>Position sensing</td>
<td>...K5</td>
<td>Special piston rod thread (not possible with K3)</td>
</tr>
<tr>
<td>MQ</td>
<td>Short end cap without swivel mounting (not possible with S2)</td>
<td>...K8</td>
<td>Extended piston rod at front</td>
</tr>
</tbody>
</table>

The repair steps can be found in chapter 4.8 "Repair steps for replacing the sealing seat".

4.8 Repair steps for replacing the sealing seat

4.8.1 Removing the sealing seat

- Loosen the sealing seat from the bearing cap (the rear bearing cap also on cylinders with through piston rod (S2)) and unscrew it.
- Pull the sealing seat away from the bearing cap and piston rod.
- Clean the thread of the bearing cap.

4.8.2 Greasing the piston rod

- Pull the piston rod as far as possible out of the cylinder barrel.
- Check the piston rod for damage.
  The entire cylinder must be replaced if the piston rod is showing significant damage.

- Clean the piston rod as described in chapter 5.1 "Cleaning".
- Apply a thin layer of the grease included in the set of wearing parts to the surface of the piston rod (see chapter 5.2.2 "Thin grease film").
4.8.3 Assembling the new sealing seat

**Note**
It is recommended to replace the O-ring between the sealing seat and cylinder body with a new one when replacing the sealing seat (spareparts.festo.com).

- Grease the new O-ring and insert it into the groove of the sealing seat (both sealing seats on cylinders with through piston rod (S2)).

- To protect the bearing and seals, place the appropriate mounting sleeve (see chapter 7.2 "Special tools") on the thread of the piston rod to prevent damage.

- Guide the bearing cap (both bearing caps on cylinders with through piston rod (S2)) over the mounting sleeve onto the piston rod as far as the cylinder barrel.

- Screw the sealing seat into the bearing cap (both bearing caps on cylinders with through piston rod (S2)) and tighten it to the corresponding torque (see table).

<table>
<thead>
<tr>

<td>85 Nm</td>
</tr>
</tbody>
</table>

- Perform a functional test as per the operating instructions (enclosed with the cylinder or can be called up on the Festo website (www.Festo.com)) and commission the repaired cylinder.
5 Cleaning and greasing

5.1 Cleaning

The seals are designed so that the lubricant film applied to them will be effective for the service life of the seal. The cylinder must be thoroughly cleaned of all foreign particles, machining residues and old lubricants before it is greased to ensure that this "life-time lubrication" is retained.

**Warning**

Festo recommends Loctite 7063 and Loctite 7070 for cleaning. When using other cleaning agents, make sure that they do not corrode the seals of the cylinder with piston rod. In case of doubt, check the resistance of the seals using the data on the Festo website ([www.Festo.com](http://www.Festo.com)).

5.2 Greasing

The various components and seals of the cylinder with piston rod require different levels of greasing depending on a number of factors.

**Warning**

To guarantee the life-time lubrication, the piston rod with assembled piston and piston seals must be moved a number of times across the entire stroke of the cylinder barrel to produce an even lubricant film.

5.2.1 Extremely thin grease film

A barely continuous film of grease covers the bearing surface. The grease can give a sheen to the surface; however, the colour of the grease must not darken it.

**Recommendation:**

Apply the grease using a cloth or similar dipped in the grease.

Remove the excess grease from the seal system components (e.g. by drawing the assembled piston with the piston rod once fully through the greased cylinder barrel) and then remove the excess from the seal components by wiping it off.

5.2.2 Thin grease film

A film of grease covers the bearing surface so that the grease colour darkens the surface slightly.

**Recommendation:**

Apply the grease with a soft brush or similar.

5.2.3 Grease reservoir

There is a certain amount of oil enclosed between two sealing rims or in enclosed ring volumes.

6 Maintenance and care

Clean any dirt from the piston rod using a soft cloth.

All non-abrasive cleaning agents are permissible. In addition, the cylinders are maintenance-free as they have been lubricated for life. Regular removal of the lubricant on the surface of the piston rod reduces its service life.
7 Tools

This chapter provides an overview of the tools and accessories required to repair the cylinder with piston rod.

7.1 Standard tools

The following standard tools among others are required to repair the cylinder with piston rod:
- Screwdriver
- Wrench
- Torque wrench (see tables in the corresponding repair steps for values)

7.2 Special tools

The following special tools are required to repair and service the cylinder with piston rod:

<table>
<thead>
<tr>

</thead>
<tbody>
<tr>
<td>Mounting sleeve for piston rod</td>
<td>The mounting sleeve for piston rods for protecting the piston rod seal and the bearing in the bearing cap while the repair is being carried out must be produced by the customer. The schematic diagram can be found in the information brochure &quot;Accessories, equipment and tools&quot; (7Accessories_a_en).</td>
<td></td>
</tr>
</tbody>
</table>

Documents

Further information on the special tools and schematic diagrams can be found in the information brochure "Accessories, equipment and tools" (7Accessories_a_en). It can be found in the online spare parts catalogue on the Festo website (http://spareparts.festo.com/xdki/data/SPC/0/PDF_SAFE/Hilfsmittel.pdf).

8 Liability

The General Terms and Conditions of Sale of Festo AG & Co. KG, which can be viewed on the Festo website (www.Festo.com), apply.
Conditions of use for “electronic documentation”

I. Protection rights and scope of use
The file of your choice is subject to protection provisions. Festo or third parties have protection rights concerning this electronic documentation which Festo makes available on portable data storage media (floppy disks, CD-Rom, removable disks) as well as on the Internet and/or Intranet - always referred to as electronic documentation hereinafter. Provided third parties are entitled to partial or full rights concerning this electronic documentation, Festo shall have the corresponding rights of use. Festo permits the user to use the electronic documentation under the following conditions:

1. Scope of use
   a) The user of the electronic documentation is allowed to use this documentation for his own, exclusively company-internal purposes on any number of machines within his business premises (location). This right of use includes exclusively the right to save the electronic documentation on the central processors (machines) used at the location.
   b) The electronic documentation may be printed out on a printer at the location of the user as often as desired, providing this printout is printed with or kept in a safe place together with these conditions of use and other user instructions.
   c) With the exception of the Festo logo, the user has the right to use pictures and texts from the electronic documentation for creating his own machine and system documentation. The use of the Festo logo requires written consent from Festo. The user himself is responsible for ensuring that the pictures and texts used match the machine/system or the relevant product.
   d) Further uses are permitted within the following framework:
      Copying exclusively for use within the framework of machine and system documentation from electronic documents of all documented supplier components. Demonstrating to third parties exclusively under guarantee that no data material is stored wholly or partly in other networks or other data storage media or can be reproduced there.
   Passing on printouts to third parties outside of the provision stated in item 3, as well as any editing or other use, is not permitted.

2. Copyright note
   Every "electronic document" receives a copyright note. This note must be included on every copy and every printout.
   Example: E 2003, Festo AG & Co. KG, D-73726 Esslingen

3. Transferring the authorisation of use
   The user can transfer the authorisation of use in the scope of and with the limitations of the conditions in accordance with items 1 and 2 completely to a third party. The third party must be made explicitly aware of these conditions of use.

II. Exporting the electronic documentation
   When exporting the electronic documentation, the licence holder must observe the export regulations of the exporting country and those of the purchasing country.

III. Warranty
   1. Festo products are being further developed with regard to hardware and software. The hardware status and, where applicable, the software status of the product can be found on the type plate of the product. If the electronic documentation, no matter in what form, does not directly accompany the product, i.e. if the product is not supplied together with a portable data storage medium (floppy disk, CD-Rom, removable disk), Festo does not guarantee that the electronic documentation corresponds to every hardware and software status of the product. In this case, the printed documentation from Festo accompanying the product alone is decisive for ensuring that the hardware and software status of the product matches that of the electronic documentation.
   2. The information contained in this electronic documentation can be amended by Festo without prior notice and does not commit Festo in any way.

IV. Liability/Limitations of liability
   1. Festo supplies this electronic documentation in order to assist the user in creating his machine and system documentation. In the case of electronic documentation that does not directly accompany a product in the form of portable data storage media (floppy disk, CD-Rom, removable disk), i.e. that is not supplied together with that product, Festo does not guarantee that the electronic documentation provided/supplied separately matches the product actually used by the user.

The latter applies particularly to extracts of the documents for the user's own documentation. The guarantee and liability for separately provided/supplied data storage media, i.e. except for the electronic documentation provided/supplied via the Internet/Intranet, is limited exclusively to proper duplication of the software, whereby Festo guarantees that in each case the data storage medium or software contains the latest update of the documentation.

Concerning electronic documentation available on the Internet/Intranet, there is no guarantee that it will have the same version status as the last typographically published edition.

2. Furthermore, Festo cannot be held liable for the lack of economic success or for damage or claims by third parties resulting from the use of the documentation by the user, with the exception of claims arising from infringement of the protection rights of third parties concerning the use of the electronic documentation.

3. The limitations of liability as per paragraphs 1 and 2 do not apply if, in cases of intent or gross negligence or the lack of warranted quality, liability is absolutely necessary. In such a case, Festo’s liability is limited to the damage discernable by Festo when the definitive circumstances are made known.

V. Safety guidelines/documentation
   Warranty and liability claims in conformity with the aforementioned regulations (Items III. and IV) may be raised only if the user has observed the safety guidelines of the documentation in conjunction with the use of the machine and its safety guidelines. The user himself is responsible for ensuring that the electronic documentation, when not supplied with the product, matches the product actually used by the user.
